Spam Filtering Introduction

Overview

With the increasing growth of the internet over recent years a company with an online presence is now at greater risk of attracting spam. Summit Internet can provide a product for your domain to effectively decrease the amount of spam that you receive.

What Is Spam Filtering?

Spam filtering uses specified rules in its process of filtering your incoming emails which you as a client control. The rules created by you make decisions based on matching a regular expression for example: key words in the subject line or message body. This then allows the automatic processing of your incoming emails and separates the spam.

What does it cost?

A setup fee of \$150.00 Ex GST to activate your account

A monthly fee of \$50.00 Ex GST (per account) which includes a single user login

Any additional domains you may wish to register with spam filtering will cost \$50.00 ex GST per domain along with the additional monthly fee of \$50.00 ex GST per domain.

Upon activation of your new account you will be given 1 hour of training on how to manage the level of spam filtering you require. Only 1 log in provided per account

Acceptance of Service:

I, the customer, understand that I will be charged a once off account setup fee of \$165 Inc GST for the setup of my domain name with Summit Internet . Any addition domain I wish to add to my account will incur a \$55 Inc GST fee. A recurring fee of \$55 will be charged per domain name at monthly intervals for the life of the account.
